VNI West Landowner Declaration

We, the undersigned, declare that any access to our properties, within or adjacent to the proposed route, is denied for on-ground works or surveys involved with the planning and construction of the VNI West Transmission Project. This includes TCV staff, engaged contractors or any company seeking to progress this project. This project has been imposed, without notice or consultation on a productive, harmonious and environmentally aware rural community whose shared vision is the efficient production of food and fibre to sustain our nation and others around the world. The proponents of this project have no social licence to proceed as they have demonstrated a calculated disregard for the rights of landowners and an insulting, dismissive attitude towards our communities and the agricultural industry as a whole. The legitimate fire safety concerns expressed by our community have not been addressed and we will not tolerate the introduction of energy infrastructure onto our land that creates new fire risk and impediments to effective fire control. We will resist any attempt to enter our land and demand that this project is brought to an immediate halt.
